

### **Turkish Customs requirements as per June 01 2016**

As from June 01, 2016, Turkish customs authorities make it mandatory to provide ACI (Advanced Cargo Information)

For Turkey bound shipments, the AWB must clearly indicate:

- Consignee Tax Number in Consignee Section
  - If the consignee is a Turkish individual, a Turkish ID number must be inserted
  - If the consignee is a foreigner individual, a passport number must be inserted
  - If the consignee is a foreign company, the tax number of the broker clearing the goods must be inserted.
- HTS Code of Product (6 digits) in Nature and Quantity Section

In case of incomplete information, the shipment is NOT ready for carriage and cannot be accepted as such.

A new AWB must be issued as amendments of the paper AWB are not accepted by the authorities.
